DETAILED ACTION—ex parte Quayle

1. This application is in condition for allowance except for the following formal matters: The claims are replete with grammatical errors that must be corrected. For example, in claim 1, line 1: “characterized in that, includes a drive mechanism...”; line 2 “transform input shaft’s”; line 2 “into output shaft’s”; line 5 “well-airtight”; line 9 “when these are”; line 11 “swing from left to right by turns”; line 12 “rotate clockwise all along”; lines 13-15 “the force-transmitting link and the pair of bevel gears and to rotate anti-clockwise, that is, this manpower vehicle runs forward”.

Note that the above is only a sample, not a complete listing of all of applicant’s recitations that are objected to. Applicant is required to review the claims and remove all inconsistencies, etc. which are grammatically incorrect or confusing.

Specification

2. The substitute specification filed March 3, 2004 has not been entered because it does not conform to 37 CFR 1.125(b) and (c) because: it does not include a statement asserting that no new matter has been included, nor is there a marked up copy detailing all changes made, as required by the above section of CFR.

Allowable Subject Matter

3. Claims 1-16 would be allowable if rewritten or amended to overcome the formality objections set forth above in this Office action.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hung (U.S. Patent No. 6,764,088 B2), Eschenbach (U.S. Patent No. 6,715,779 B2), Park (U.S. Patent No. 6,578,861), Mohseni (U.S. Patent No. 5,520,401), Rinkewich (U.S. Patent No. 5,294,140), and Yoshihiro (JP Patent No. 5—50974) disclose bicycle pedal power assemblies having reciprocating lever arms and associated gearing.

5. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

6. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

Applicant is advised of the availability of the publication "Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office." This publication is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.
